

CLS (UK) Infrastructure Ltd

The Avenue Coking Works, Chesterfield

Client

Homes and Communities Agency, part of the UK Government

Main Contractors

VSD, a joint venture between VolkerStevin (the UK based civil engineering company), Sita Remediation (the Dutch thermal treatment specialist) and DEC (the Belgian based environmental contractor).

Suppliers Include

Construction Labour Solutions (UK) Ltd

The Project

£92.3 Million

Overview

Formerly the Avenue Coking Works in Wingerworth and thought to be one of the most contaminated sites in Western Europe. This project involves transforming heavily polluted industrial land into a place that can be used and enjoyed by people and wildlife. When completed, the site will house residential and business accommodation, public open space, sporting facilities and ecological habitats.

Contract Duration

From 2009 and ongoing (expected completion 2015)
